# EO-WIDGET = Realization of CbM & AMS as Contractor-Operated Services

Implements **customized CAP strategies** of “Checks by Monitoring (CbM)” and the “Area Monitoring System (AMS)”

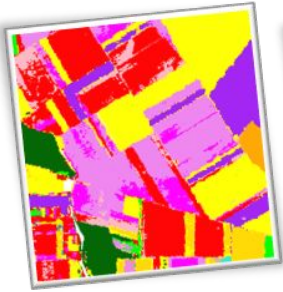

**Paying Agencies** choose the depth of integration via APIs within their IACS

**Contractors** in value chain supply infrastructure, satellite data processing, APIs, expert Apps, and validation support

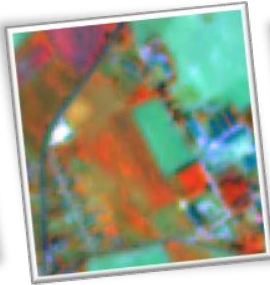

# Products & APIs

.Homogeneity

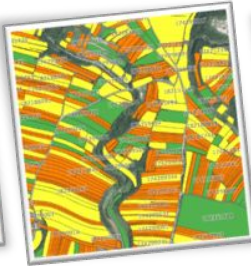

.Imperviousness

.Cover

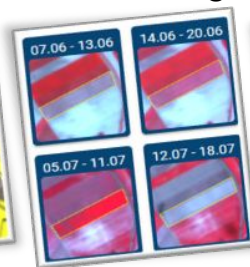

.Change

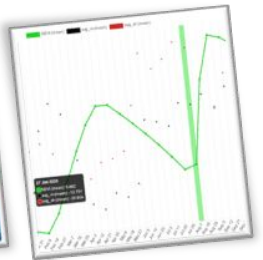

.Type

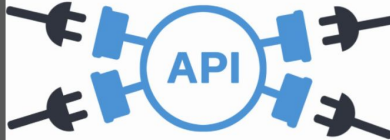

.Mowing

.Harvest

→ see companion paper of D. Kowitz in Slot 3

After validation, PA imports data into IACS via the provided Application Programming Interface

# WebGUI / App

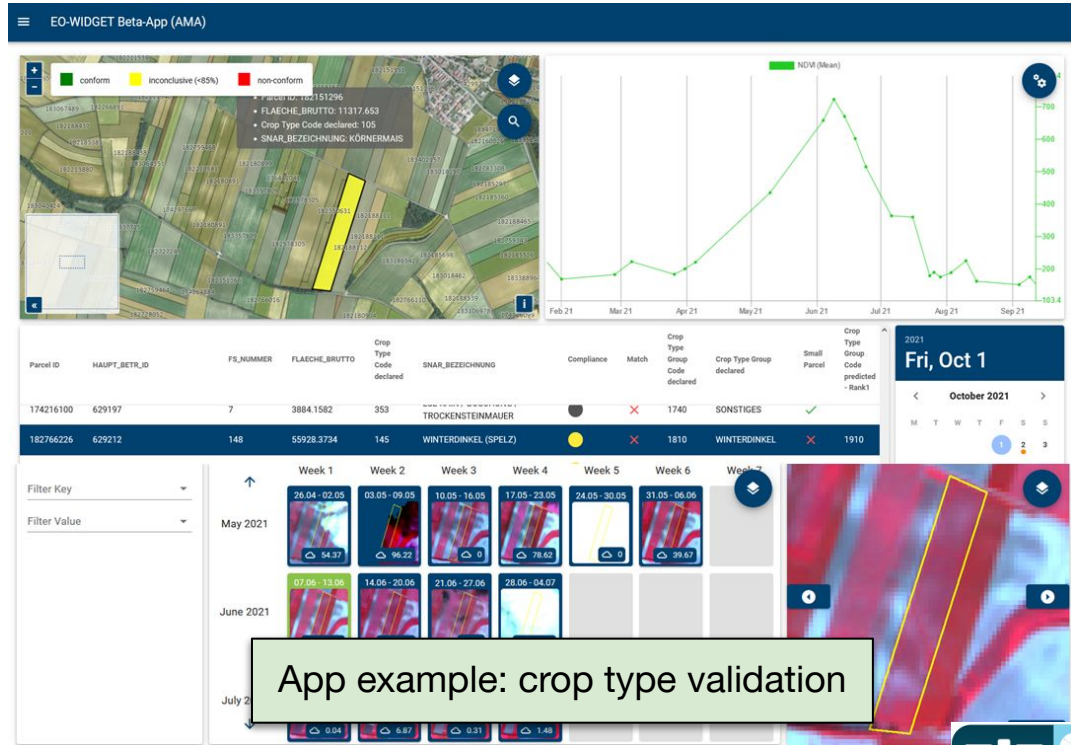

- Parcel Explorer
- Quality Assessment Tool
- Expert Judgement & Workflow App
